Joint CE Accreditation

ACPE, the Accreditation Council for Continuing Medical Education (ACCME), and the American Nurses

Credentialing Center (ANCC) Accreditation Program continued collaboration in offering “Accreditation of Continuing Education Planned by the Team for the Team.” The goals of this joint accreditation are to support healthcare team-focused education that improves patient care, and at the same time to streamline the accreditation processes. Joint Accreditation for the Provider of Continuing Education for the Healthcare Team is available for organizations already accredited by at least two of the three national accrediting bodies: ACCME, ACPE, and/or ANCC or one national accrediting body (ACCME, ACPE or ANCC) and one state accrediting body (ACCME Recognized Accreditor or ANCC Accredited Approver). Creative Educational Concepts, Inc., Department of Justice Federal Bureau of Prisons Health Services Division, Duke University Health System Department of Clinical Education and Professional Development, and National Committee for Quality Assurance (NCQA) are the organizations to receive this joint accreditation as providers of continuing education for health care professionals in 2012.

CPE Monitor

ACPE and the National Association of Boards of Pharmacy (NABP) developed a continuing pharmacy education (CPE) tracking system that will authenticate and store data for completed CPE units received by pharmacists and pharmacy technicians from ACPE-accredited providers. The system promises to save state boards of pharmacy, CPE providers, pharmacists, and pharmacy technicians time and cost by streamlining the process of verifying that licensees and registrants meet CPE requirements and by providing a centralized repository for pharmacists’ and pharmacy technicians’ continuing education details. The CPE tracking system will create a direct link for sending CPE data from ACPE-accredited providers to ACPE and then to NABP, ensuring that all reported CPE units are officially verified by ACPE-accredited providers. Providers will no longer need to provide electronic or printed statements of credit to their pharmacist and pharmacy technician participants. Instead, once information is received by NABP, the tracking system will make CPE data for each participant available to the state boards of pharmacy where the participant is licensed or registered. CPE Monitor became fully operational in early 2012. CPE providers had until the end of 2012 to implement the system and from January 1, 2013 onwards, data provided to CPE Monitor is the official record of participants’ CPE activities.

Continuing Professional Development Task Force

The Continuing Professional Development Task Force met in May and November 2012. The CPD Task Force

members include: Janet Cline, Creative Educational Concepts, Inc.; Jeannine Dickerhofe, Kaiser Permanente Colorado; Anna Legreid Dopp, WEA Trust and Access Community Health Center; Shelby Englert, American Pharmacists Association; Kristin Janke, University of Minnesota; Eileen Lewalski, National Association of Boards of Pharmacy; Jennifer Moulton, Collaborative Education Institute; Michael Simeone, University of Rhode Island; Toyin Tofade, University of Maryland; and CoraLynn Trewet, University of Iowa. The work of the Taskforce contributes to ACPE's ongoing goal to improve the approaches and strategies that pharmacists and pharmacy technicians adopt for their lifelong learning.

Bi-Annual CPE Conference Planning

The ACPE CPE Commission and staff are planning for ACPE's 15th ACPE Conference that will take place October 1-4, 2013 at the Hyatt Regency in Minneapolis, Minnesota. The theme for this year's conference is "Advancing Quality Continuing Education: Navigating the Waters."

REMS

The 2011 Prescription Drug Abuse Prevention Plan by the Office of National Drug Control Policy (ONDCP) includes education as one of the four major areas to reduce prescription drug abuse. The goal of the Plan is to combat the current prescription drug abuse epidemic through a 15% reduction in prescription drug abuse by 2015 while preserving patient access to these medications. An FDA-required REMS program is a strategy set in place to assist in ensuring that the benefits of extended-release (ER) and long-acting (LA) opioid analgesics outweigh the risks before being prescribed to patients. Under this REMS, companies that manufacture ER/LA opioid analgesics will be required to make education programs available to prescribers based on an FDA Blueprint. These companies are providing educational grants to continuing education (CE) providers who will develop and deliver the training. The training is strongly encouraged for all prescribers (e.g. physicians, nurse practitioners, physician assistants, and dentists) and other health care providers with direct patient care (e.g. pharmacists). In order to be considered REMS-compliant, CE activities must meet the following requirements:

- Delivered by an accredited continuing education (CE) provider
- Address all aspects of the FDA blueprint
- Include a post-activity learning assessment
- Subject to independent audit of content and compliance with applicable accreditation standards

Invitational Conference

The ACPE Board and Staff worked well together and with Bill Zellmer in planning the ACPE Invitational Conference *Advancing Quality in Pharmacy Education: Charting Accreditation's Future*. The conference was held in September 2012 in Atlanta, Georgia. There were 101 attendees, 80 were invited guests, 10 were ACPE Board Members, 7 were professional staff, and 4 were conference support staff. With very few exceptions, the participants rated the conference evaluation statements as "Strongly Agree or Agree". The proceedings of the conference will be published in the *American Journal of Pharmaceutical Education* in April 2013. The prioritized recommendations will inform the next round of degree program standards revision. The recommendations address needed pharmacy graduate competencies and their assessment, as well as curricular modifications.

International Commission Activities

The ACPE International Service Program (ISP), established by the ACPE Board in January 2011, developed the following foundational documents to prepare for the implementation of ISP activities; the documents were approved at the June 2012 Board of Directors meeting: *International Quality Criteria for Certification of Professional Degree Programs in Pharmacy* and *Policies and Procedures for Certification of Professional Degree Programs in Pharmacy in Countries other than the United States and its Territories*. Members of the International Commission received training on the Quality Criteria and Policies and Procedures at the November 2012 meeting. More than 20 schools from 16 countries have enquired about certification of their pharmacy degree program by ACPE. It is anticipated that several of these will submit formal applications over the next two years.

Interactions with Other Organizations

In addition, the ACPE staff was active in interactions and activities designed to enhance ACPE's ability to conduct its core activities; keep abreast of developments in the field of accreditation and in pharmacy; and ensure enhanced communications with and understanding of ACPE by our constituents. ACPE Board and/or Staff members made presentations at or attended the following meetings: Accreditation Council for Continuing Medical Education, Alliance for Continuing Education in the Health Professions, American Association of Colleges of Pharmacy, American Association of Pharmacy Technician, American Federation for Pharmacy Education, American Medical Association, Taskforce on CME-Industry Collaboration, American Nursing Credentialing Center, American Pharmacists Association, American Society of Health-System

PROFESSIONAL PROGRAMS OF COLLEGES AND SCHOOLS OF PHARMACY

Accreditation Actions Taken

On the basis of comprehensive, focused, and staff consultation evaluations conducted during the reporting year, communications received from the institutions, ongoing review of first-time NAPLEX® passing rates, entry class size, attrition, academic dismissals, withdrawals, and on-time graduation rates, and comments of the Public Interest Panel, the Board of Directors determined the accreditation status along with specified terms and conditions for various professional programs noted below. (Note: A list of accredited professional degree programs of colleges and schools of pharmacy, which designates the respective history of the accreditation status of the programs and the academic year for the next currently scheduled evaluation, is posted on the ACPE web site at www.acpe-accredit.org.) An action to “affirm” implies that a previously established accreditation term has been confirmed. An action to “continue” implies that the accreditation date has been extended. Annual Monitoring

In addition to the monitoring presented above, all programs are monitored through statistical analysis of enrollment, attrition, academic dismissals, withdrawals, and on-time graduation rates provided by AACP and review of graduates' performance on NAPLEX® examinations provided by NABP. Review of the data required the sending of a letter of concern to several colleges or schools of pharmacy, in accord with established monitoring criteria.

Self-Study Training for Colleges and Schools of Pharmacy

A workshop was conducted for deans and self-study chairs in August 2012 with over 36 attendees participating in the training.

Evaluation Team Member Training

Review of the accreditation process, with a special focus on the role and responsibilities of evaluation team members, was conducted at a training workshop held in Chicago. Over 405 potential site team members have now been trained at the workshops to address Standards 2007 and the new review procedures (evaluation form, standardized surveys, etc.). Webinars to train board, staff and site team members on Standards 2007 Guidelines 2.0 began to be conducted in fall 2011 and continued in 2012 to ensure that all teams had members that were trained on the Guideline revisions.

Evaluation Team Members

The success of the on-site evaluation depends upon the substantial efforts and dedication of many individuals (in addition to ACPE Board members and staff) who serve voluntarily as evaluation team members.
